Autodesk Fusion 360 is cloud-based software and as such has regular version updates. This course uses examples and information relating to the Fusion 360 2.0.6516 version. If you are using another version, earlier or later, you may find slight differences in the actual software you use the graphics provided for the training. This course will teach you the basics of 3D Modelling in the Fusion Environment and take you from creating freeform 3D models to documentation.

TRAINING PRICE	COURSE DURATION	CPD POINTS
R5 000.00 (Excl VAT)	3 Days Times: 9:00 - 16:00	ECSA / SAIMechE - 3 Credits

Prerequisites

- Basic Computer Skills
- Basic Drawing Techniques

Course Objectives

The Autodesk Fusion 360 training course provides you with an understanding of the parametric design philosophy using the Autodesk Fusion 360 software. Through a hands-on, practice-intensive curriculum, you will learn the key skills and knowledge required to design models using the Autodesk Fusion 360 software.

Exams and Certifications

- Autodesk certified user exam

Who should attend

- Multi-Disciplinary Draftsperson

Topics Covered

- Introduction to Fusion
- Sketching
- Solid Modelling
- Work Planes
- Solid Modelling Continued
- Sculpting & Forms
- Assemblies & Mult Component Designs
- Rendering and Materials
- Animation Workspace
- Drawing Workspace
